# Anti-Counterfeit Statement

Doc No: AC-001 | Rev: 1.0 | Effective Date: 15 July 2024 | Last Review: 08 January 2025

**LaminaCore Solutions takes the issue of counterfeit materials seriously and is committed to protecting its customers, products, and supply chain from fraudulent or misrepresented components.**

We confirm that all materials and components we supply are sourced through verified and authorised channels. We do not knowingly purchase or utilise counterfeit products or materials in any part of our operations.

**To prevent the introduction of counterfeit items into our supply chain, we implement the following practices:**

- Work exclusively with vetted suppliers and manufacturers who can provide appropriate certificates of conformance and traceability.
- Require full documentation, including material certificates and batch traceability.
- Maintain incoming inspection processes to detect irregularities or inconsistencies.
- Document and quarantine any nonconforming or suspicious material for investigation.

We expect our suppliers and partners to uphold the same zero-tolerance stance toward counterfeit products and to cooperate fully in any required investigations or corrective actions.

**This statement is reviewed annually as part of our quality and compliance management processes and is available to all customers and interested parties upon request.**

Director, LaminaCore Solutions
